WORK EXPERIENCE

Lued (A) Chemicals Ltd - Support and Service Engineer

Jan. 2022 - PRESENT

- Installed, configured and serviced 15+ equipment (Mindray, Immucor, Behnk) across hospitals and research facilities to operational standards, minimizing downtime.
- Diagnosed and resolved hardware/software faults in lab equipment and IT systems, providing onsite and remote support to ensure operations continued.
- Executed preventive and corrective maintenance (firmware updates, calibration and component replacement) improving equipment reliability and lifecycle.
- Managed organization's IT infrastructure, supporting windows and linux systems and printers, facilitating smooth operations.
- Provided user training and support to lab personnel on equipment usage and basic troubleshooting, enabling them to resolve minor issues and reduce support requests.
- Maintained technical documents including service reports and maintenance schedules.
- Oversaw inventory via ERP (Sage 200 Evolution), tracking spare parts, reagents and IT assets to avoid stockouts.
- Supported pre-sales activities by preparing tenders, quotations and technical proposals tailored to customer requirements.

Blink Electrics Ltd - Electronics Engineer (Intern)

Oct. 2020 - Oct. 2021

- Assisted in diagnosing faults on electronic systems using tools like multimeters and oscilloscopes to identify and resolve issues.
- Participated in firmware development (C/C++) for microcontrollers devices, using Arduino and Raspberry Pi boards to test firmware and support hardware-software integration.
- Supported testing and repair of industrial equipment, including PLC systems under guidance from senior engineers.
- Created PCB layouts using CAD tools (Fusion 360, Eagle, EasyEDA, Altium) for prototype development and in-house testing.
- Reviewed circuit diagrams and datasheets to support troubleshooting during repair and development.

Emertxe - Remote Internship in Embedded Systems and IoT

Phase 1: Feb. - May 2022 - Phase 2: Nov. - Jan. 2023

- Completed a remote internship in embedded systems and IoT, developing skills in C/C++, PCB design and hardware interfacing.
- Collaborated on team projects, including a Car Black Box system, and earned a certification from Emertxe (NSDC & ESSCI).

EDUCATION

Bachelor's Degree in Electronics

South Eastern Kenya University.

Full Stack Development

Sankhyana Consultancy Service (P) Ltd.

❖ *Stack:*

- **Frontend:** HTML, CSS, JavaScript, React.js, jQuery.
- **Backend:** Node.js, Python, Django, Flask, REST APIs.
- **Database:** MySQL.

PROFESSIONAL MEMBERSHIP & ACCREDITATIONS

Engineering Technologist (TET-K) – *Institution of Engineering Technologists and Technicians (IET-Kenya).*

ICT Graduate – *ICT Authority of Kenya.*

SKILLS

Technical Service and Field Support:

- Equipment installation, calibration and maintenance.
- Diagnostics and fault isolation in electronics/electrical systems.
- Schematic interpretation and circuit-level analysis.
- Preventive and corrective maintenance planning and execution.
- On-site servicing, customer support and user training.
- Inventory management: Stock tracking, ordering and spare parts coordination.
- Technical documentation and service reporting.
- Pre-sales activities: Tenders, quotations and proposal preparation.

Electronics and Embedded Systems:

- Embedded systems development (C/C++) with hardware integration.
- Circuit design, prototyping, soldering and PCB fabrication.

IT Systems and Software:

- IT infrastructure deployment and support (windows, linux, macOS).
- Frontend: HTML, CSS, JavaScript, React.js, jQuery, UI/UX.
- Backend: Python, Django, Flask, Node.js, REST APIs, Git.
- Database: MySQL
- Mobile app development: React Native.
- Hardware/software troubleshooting, installation, updates, and remote support.
